

## Integrated Gas-Can and Rack System

*Everyone who has ridden a snow bike in the mountains knows to carry extra gas to you make it back to the truck. The ST and LT kits now come with a Mountain Addiction Gas-Can that is a perfect fit in the newly designed gas-rack incorporated into the tunnel. The Can simply drops in the rack and is held in place with a high quality ratcheting strap that is similar to a snowboard binding.*

*The system is extremely simple to use as it enables quicker fill-ups and reduces the risk of losing fuel cans in the back country. Note: This does not apply to the SX model (gas can not included on SX).*
