

Deluxe SUP/Surfboard Carrier

SKU#: MPG171

Warranty: One Year

All new this year, the Deluxe Paddleboard Kit is an economic entry level system that works with or without vehicle cross bars. The oversized rooftop blocks can handle any size of SUP or surfboard currently on the market. Each block features a non-slip TPR bottom that works great on a bare roof.

The set also includes two 22" spacer pads which allow two boards to be transported safely without damage. Simply place the pads between the boards and tighten with the 15' heavy duty load straps.

Each set comes complete with a reusable tote bag and step by step instructions. For further questions, please call 1-800-295-0042 and a technical support specialist will work with you on your specific installation.
