

GoPro Magenta Dive Filter (for Dive + Wrist Housing)

Designed for use with the Dive Housing and Wrist Housing, the Magenta Dive Filter provides color correction while capturing footage in green water at depths of 15' to 70' (4.5m to 21.3m). It's ideal for freshwater lakes and reservoirs, or salt water that appears green due to algae. The filter snaps into place for quick, tool-free installation, and features scratch-resistant, optical-grade glass to ensure optimal image clarity. Includes a carrying bag and camera tether.
