

Rotomolded Kayaks - Epsilon P300

Boreal Design Epsilon P300 made for the taller paddler or folks wanting more leg room and a great amount of storage for those longer trips! The 300 is a tour operator dream kayak since you can put any client in it and be confident in the paddling experience. Boreal design has invested in high quality rotomolding plastic that makes boats stiffer, and provides more UV protection. The deck has abundant bungee and safety line for additional deck accessories and even with its large storage capacity it still has a low side profile reducing weather-cocking. A great cruising speed and dry ride make it a pleasure to paddle and its stability allow you to pull out the Digital SLR and photograph your favourite Sea Otter. If comfort is what you are looking for and a kayak that makes you look good look no farther, its the Epsilon P300.

Epsilon
