

## ***Expedition Deck Bag***

*Attaches easily to the Modular Deck System or onto any deck using existing deck lines. Attach additional gear using the shock-cord lacing on the top or 3/4" webbing and side release buckles attached to each side. It has a large zippered opening, and a small mesh pocket in front to store sunscreen and sunglasses for easy access. It is easy to remove, has loads of cargo space, and is contoured to follow the profile of your boat. The unique Non-Slip attachment system uses a 14oz vinyl base sewn at the rear of the bag and held with hook and loop. A polyethylene liner shapes it for easy access through the front zippered entry. This bag is not 100% watertight, but it's so roomy inside that you can put a camera or other electronic gadget in a small waterproof case and it will still fit inside.*

### Product Specifications
