

Interior Mounted Cockpit Bags

The Interior Mounted Cockpit Bags are glove compartment like bags that fit inside your boat, above your knees, to make better use of the cockpit space. Its Pelican Scoop zippered opening is designed to keep the contents of the bag from falling out when opened. North Water's SRB Mounting System makes it easy to detach and re-attach. These Cockpit Bags make use of the areas on either side of your seat. The Interior Mount Cockpit Bags can be attached onto the rudder cable or attached to the sides with quick release buckles. They are easily removable and do not interfere with your position. They can also be used to pad out your boat for a better fit. A great place to put your survival kit and other easy to reach items. These storage bags are meant to be mounted on the inside of your boats chine. The unique SRB mounting system allows these bags to be easily removed and reattached using a side squeeze buckle. The 2-3/4" vinyl disks adhere easily to fiberglass and composite boats using Vinyl Tec 2000 (50ADH-05). Sold as a pair.
