

Sea Tec Foam Paddle Float

Made of rigid closed cell foam to ensure no leaks or finicky valves the North Water Sea Tec Paddle Float is always ready. In cold water situations access to your paddle float must be immediate, reliable and simple. Stored on your back deck and ready to accept your paddle blade into the outside sleeve this self-rescue aid is built from durable UV resistant fabric and uses 1" side release buckles to make it easy for cold or gloved hands to secure and remove the float from the paddle blade. Available with radar reflective fabric, this is also a great tool for practising rolling and deep water sculling. Great tool for practising rolling and deep water sculling. Durable UV resistant fabric. Made of rigid closed cell foam. Side release buckles make it easy for cold or gloved hands to secure and remove.
