

Zeagle Big Bertha Redundant Bladder Assembly

One of our largest bladders, the Big Bertha is a dual redundant bladder assembly consisting of two independent 85 lb urethane bladders inside of a single Corduroy nylon cover. Each bladder has its own airway and a single bottom dump valve that operate independently of each other. The bladder cover is a durable Corduroy nylon material with an expandable elastic nylon insert on the front of the bladder to retract the bladder.

Product Specifications

Dual redundant 55 lb lift capacity bladders inside a single Corduroy nylon cover Available with insert for mounting on metal back-plates or without for mounting on Zeagle BCs Capable of mounting single or twin cylinders One lower dump valve per inner bladder.

Expandable elastic nylon panel to streamline the assembly.
