

Zeagle Onyx II Regulator

With the same attractive finish and outstanding performance as the Onyx regulator, the Onyx II fills the need for those that find themselves in cooler water. The internal structure allows direct airflow through the 1st stage, providing lower turbulence for outstanding performance. A conical precision high-pressure valve provides greater reliability than conventional designs. The braided LP hose provides high flow and tremendous abrasion resistance while having great flexibility. An anodized aluminium heat sink on the 2nd stage along with the external diaphragm on the 1st stage improves the cold water performance of the Onyx regulator.

Product Specifications

FIRST STAGE: Balanced - 5 LP Ports - 2 HP Ports - Lighter weight - Stylish black finish - Dry Environmental Seal with Hydro Transmitter.
SECOND STAGE: Downstream valve - Balanced Diaphragm - Dive/Pre Dive Venturi Control - Diver Adjustable Breathing Sensitivity - New Compact Profile - Anodized aluminum heat sink - Lightweight Braided Hose Length: 30 in. (.76 m).
