

Aqua Lung Apeks Egress Octopus – Alternate Air Accessory

Innovative, low profile design minimizes drag. The pneumatically balanced valve provides superior performance for an alternate air source, making it a perfect complement to the high performing Apeks regulators.

Product Specifications

Unique 120° angle between the mouthpiece and the hose, which is ideal for sharing air with your buddy. - Large purge – easy to use either way up. - Can be routed over either shoulder. - Low profile ensures less drag in water and keeps it close to the body out of the way. - Bright colours ensure visibility in panic situations. - Breathes smoothly when positioned right side up or upside down. - High visibility 36” yellow hose distinguishes your Egress hose from your primary hose and is easily spotted in the event of an out-of-air emergency. - If used with an unsealed first stage then it is only recommended for warm waters, but is suitable for cold water diving when used with any Apeks environmentally sealed first stage.
